Producer

Dating back as far as 1874, this important domaine today covers 40 hectares of vineyard across 45 separate parcels. The diversity of soils and different ripening times allow Alexandre Favier, the current generation of the family to run the domaine, to co-ferment many of the grape varieties, in the time honoured Châteauneuf-du-Pape tradition. Harvest takes place by hand and the red wines are fermented for between 20-25 days in tank, whole bunch, before being aged in tank, concrete eggs, barrels and foudres. The white is fermented 70% in tank and 30% in Burgundy barrels.

Tasting Notes

A wine that captivates with its aromatic complexity and velvety texture. The lively attack is complemented by vibrant fruit-driven acidity, making it an approachable and refreshing wine, perfect to enjoy anytime under the serenade of cicadas
