CAN XANET

Producer

Created in 2011 by José Antonio González, Can Xanet is a 2-hectare vineyard in Northern Majorca situated between the towns of Pollensa and Alcúdia in the foothills of the Sierra de Tramuntana mountains. The soils are rich limestone and are alimented by water from the mountains, helping to prevent any severe hydric stress until well into summer. The vineyard's proximity to the sea contributes to a special microclimate, as the thermal winds that appear in summer, cool the vines, avoiding excessive early ripening. Minimal intervention is the watchword in the vineyard. Four varieties are grown: Merlot, Syrah, Mantonegro and Gorgollassa. In addition, about 1 ton of Callet is bought from a nearby organic vineyard. Grapes are hand harvested, de-stemmed and then fermented in open top wooden casks. After malolactic fermentation, 80% of the wine is aged in new, one, two and three-year-old 225L French oak barrels.
